

SAFETY INSTRUCTIONS

Retrofit kit for upgrading an existing safe

Installation should be carried out by qualified personnel or in accordance with the installation instructions supplied.

Improper installation or tampering can impair the safety and functionality of the safe.

Ensure that all parts supplied are complete and undamaged.

When drilling, screwing or adjusting, ensure that no existing mechanical or electronic components of the safe are damaged.

The retrofit kit must be attached stably and securely to prevent tampering or unintentional loosening.

The retrofit set should not be modified without authorisation or combined with incompatible components.

The retrofit kit is made of robust materials, but should be checked regularly for external damage or wear.

The manufacturer accepts no liability for damage caused by improper use, incorrect installation or tampering.
