

# SAFETY INSTRUCTIONS

## Fort Novo MySafe Smart door lock

Installation should only be carried out by qualified personnel.

The smart safe lock is intended exclusively for use on suitable safes or security systems.

Before installation, ensure that the power supply and network connection are set up correctly.

Ensure that the lock is securely integrated into the intended housing to guarantee perfect functionality.

Do not make any unauthorized changes or modifications to the hardware or software of the lock.

Access data and digital access authorizations may only be communicated to authorized persons.

PIN codes or other access data should be changed regularly and should not be kept in the immediate vicinity of the lock.

The lock must be checked after each use to ensure that it is correctly locked.

The manufacturer accepts no liability for damage caused by improper use, modification or misuse of the RFID smart cards.

If tampering or unauthorized access is suspected, take appropriate security measures immediately.

Change the factory-set access data immediately after commissioning.

The lock is designed for indoor use or protected outdoor areas - avoid direct exposure to the weather.

The manufacturer accepts no liability for damage caused by improper installation, incorrect use or manipulation.
