

SAFETY INSTRUCTIONS

masunt Vertical columns and letterbox systems (all models)

The installation must be carried out on a stable, level surface to ensure stability.

Only use suitable fixing material that complies with local building regulations.

During installation, observe the load limits of the column and ensure that the product is firmly and securely anchored.

Installation should be carried out by qualified personnel.

The product is only suitable for its intended use as a free-standing pillar for letterboxes and/or key dispensing systems.

The pedestal is not suitable as a climbing aid or support for additional, unintended loads.

The product is made of stainless steel (V2A). Nevertheless, regular cleaning with suitable stainless steel cleaners should be carried out to remove environmental influences such as salt or dirt deposits.
