

# SAFETY INSTRUCTIONS

## FortNovo Transfer safe 5000 with throwback

Installation should only be carried out by qualified personnel.

The safe must be firmly anchored to a stable, load-bearing surface or wall to ensure maximum protection.

The mounting materials must comply with local building regulations and be sufficiently strong.

Access to the safe should be chosen so that it is not easily visible or accessible to unauthorized persons.

The key or access code for the safe should only be known to authorized persons.

If the safe is installed in an area with an increased risk of burglary, additional security monitoring (e.g. camera monitoring) should be considered.

The manufacturer accepts no liability for damage caused by improper use, incorrect installation or tampering.
